

SPS Commerce EDI for TRAVERSE

SPS Commerce's EDI for TRAVERSE provides your organization with the benefits of outsourced EDI while tying directly into your company's existing TRAVERSE application. A company can take advantage of the multi-tenant, world-class retail EDI maps for all its customers while creating a single point of integration into TRAVERSE.

SPS Commerce uses a combination of proven technologies and best practices to quickly enable companies to trade electronic purchase orders, advanced ship notices, invoices and any other required documents. Due to its Software-as-a-Service (SaaS) model, this solution enables users to easily communicate important documents globally to customers, suppliers, third party logistics providers, factors, manufacturers, expeditors and sourcing agents.

SPS Commerce.net – The EDI Software Alternative

By directly connecting to the TRAVERSE application with SPSCommerce.net, you connect with the largest network of retailers in the world. With over 1,200 retailers currently connected, you will most likely find that your customers are already trading on our network.

Leveraging the Power of SaaS Throughout Your Supply Chain

With SPS Commerce's integration to TRAVERSE, you have a pre-built integration option to SPSCcommerce.net for high volume documents like purchase orders and invoices.

Your TRAVERSE application integrates directly into SPS Commerce (rather than to each customer), greatly reducing both the initial and ongoing integration work. This single transaction integration accommodates all your customers' current and future data requirements and is fully leveraged when you add connections to new customers.

Meet All Your EDI Requirements

The SPS Commerce integration with TRAVERSE also features:

- Easy to use SaaS ASN module
- Cross-referencing for Customer, Item and Ship-to Addresses
- Pre-built integration for third-party logistic provider (3PL) requirements
- Support for multiple order management models including Cross-dock and Ship-to-Store
- Online label service, meaning full compliance with all of your customers' GS1-128 (formerly UCC-128) labels without extra software

Extensive Document Library

This flexible TRAVERSE solution supports existing EDI documents as well as new XML-based documents, so your initial investment can be leveraged with the ongoing demands of your customers and trading community. SPSCcommerce.net supports the following documents and more.

- ASN w/Multiple P.O.s
- Blanket P.O. w/P.O. Releases
- Credit/Debit Adjustment
- Free Form Text Messaging
- Order Inquiry
- Organization Relationship w/Cross Dock Planning Schedule w/Release
- and hundreds more ...
